DOI: 10.1109/ICAUC68182.2026.11441214.

PROJECTS

1. AssureSky - AI Powered Weather & News Companion

- **Description:** An AI-powered weather application built with Flutter and Flask that provides real-time weather updates, 7-day forecasts, and trending news. It features an intelligent AI Weather Advisor that analyzes current weather conditions and delivers personalized recommendations, helping users stay informed, prepared, and safe throughout the day.
- **Tech Stack:** Flutter, Dart, Flask, Python, SQLite, OpenWeatherMap API, NewsAPI, Rule-Based AI.

2. FDC - AI Powered Flutter Digital Classroom

- **Description:** An AI-powered educational platform built with Flutter and Django that transforms study materials via PDF-to-audio conversion and intelligent analysis. It combines interactive quizzes with seamless classroom management, leveraging Google Gemini and OpenAI to deliver a robust, cross-platform learning experience.
- **Tech Stack:** Flutter, Dart, Django, Python, Google Gemini, OpenAI, Django REST Framework.

3. CollabCode - IDE Platform

- **Description:** Developed a platform for collaborative coding that includes a code editor, voice calls, chat, and a whiteboard. facilitated teamwork in real time without requiring further extensions.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, WebRTC, Socket.io, Judge0 API.

4. Paws & Claws - Pet Adoption Website

- **Description:** Built a web app to simplify pet adoption, letting users browse pets, apply, and track requests. Admins could manage pet records, adopters, and follow-ups.
- **Tech Stack:** HTML, CSS, JavaScript, PHP, and SQL.
